

HAND SEALER

70-100-6090, 70-100-6060/61

Durable plastic body of the material. Simple and thin external appearance. Made of light and strong plastic compared with other hand sealers. Standard interior part in circuit board and certificated part get rid of all possibilities to bring troubles. Transformer, which is very important part in the middle of sealer functions, is made of the best quality coil and parts by Posteel®.

By the heating element made of special nickel, chrome it promises a long-term use. All wires in the body and P.C.B are coated by insulating varnish, material especially like Epoxy. By certificated safety rules PHT supplies human safety on the working.

Extraordinary plastic body not by aluminum gets rid of the possibility of electric shock through body. High quality teflon cloth and tape equipped on PHT is difference with other goods.

Product specifications and part numbers

ITEM	70-100-6090	70-100-6060	70-100-6061
MODEL	NT-200	NT-300	NT-400
DIMENSION (WxHxL)	75x200x300	75x200x410	75x200x510
TEMPERATURE OF SEALING	150 MAX		
SEALING TIME	MIN 0.5 Sec- MAX 3 Sec		
REGULAR SEALING TIME	1.5 Sec		
LENGTH OF SEALING (WxL)	2mm x200mm	2mmx300mm	2mmx400mm
POWER CONSUMPTION	310W	510W	700W
SEALING THICKNESS	0.5mm Below		
WEIGHT	3kg	3.4kg	4kg
FUSE	3A	4A	5A
MATERIAL FOR SEALING	PE, PP, LDPE, PVC
