

PGA-710 AUTOANALYSIS SYSTEM KIT

61-100-0003

Specifications:

- Measure, Record, Analyze and Report Electrostatic Voltage & Decay Performance:
 - o Footwear and flooring combinations
 - o Carts and chairs
 - o Packaging Materials and Systems
 - o Production Aids and Materials
 - o Worksurface Voltage Suppression
 - o Ionization Offset Voltage & Decay Performance
- Provides Strip Chart Recording Capabilities ± 2 kV
- Analyzes Voltage Generation and Decay Times
- Statistical Analysis at touch of a button
- Automatically Generates Reports
- Imports & Exports data via Microsoft Excel
- Automatically captures temperature and relative humidity
- Accepts data from any analog instrument having ± 2 volt output
- Self-Powered, rechargeable battery
- Charges with universal charger or via USB
- Capture & stores data for later download
- Multiple sampling rates: 50, 100 & 200 samples/sec
- Large data capacity

Walking test system kit Includes:

- ✓PGA-710B Autoanalysis System
- ✓PFM-711B Electrostatic Field Meter
- ✓CPM-720B Charge Plate Monitor
- ✓PCS-730B Electrostatic Charger
- ✓PFK-100H Instrument Holder
- ✓PFA-861H Hand Held Electrode
- ✓PGA-710CGL Charge Generation Lead
- ✓PHT-771 Digital Psychrometer
- ✓PWS-610M Fabric Band Wrist Strap (1)
- ✓Q007B Common Point Grounding Cube (1)
- ✓Autoanalysis Application Software 2.0
- ✓PIK-110C Carrying Case with Handle
- ✓PAB-024 Accessories Box
