

## X#-Series High Power setup

Flexible Inline AXI platform

The X#-platform series is an inline automated X-ray system which covers a wide range of AXI applications. It is a flexible platform with very versatile fields of use depending on the application requirements. The inspectable applications range from component level inspection for wire bonds, large SMT boards, high-power electronic modules up to fully assembled modules

The Nordson MATRIX system solutions present a modular inspection concept. The platforms feature up to 4 advanced technologies in one system: Transmission X-ray imaging (2D) with patented Slice-Filter-Technique™ (SFT), Off-Axis technology (2.5D) and 3D SART (Simultaneous Algebraic Reconstruction Technique).

The platform is available in the following configurations:

X2.5# Transmission (2D) + SFT<sup>™</sup> + Off-Axis (2.5D)

X3# Transmission (2D) + SFT<sup>™</sup> + Off-Axis (2.5D) + 3D SART
