

## MiniATE

**In-circuit** and **Functional** portable tester with limited size and extended potential all in one: **small and integrated solution**

**Mini-200** is an instrument offering a full integration of all performance in a limited dimension. can be used in laboratories as well as production and can be integrated into more complex systems.

**Mini-80** is an instrument able to offer the perfect compromise for cost/feature integration as it can be configured for multiple applications including device programming. used in laboratory and production

- Up to 192 (Mini 80), 640 (Mini 200) non-multiplexed channels
- In-circuit and functional test capabilities
- Connector interface to external receiver
- DSP-based measurement system
- On board programming capability for digital devices
- 1 integrated (Mini 80), Multiple (Mini 200) programmable power supplies
- High Power test capability
- Possible integration of Boundary scan feature
- 19" rack compatible
- External (Mini 80), Internal (Mini 200) controlling PC
- Portable and fully integrated solution with small dimension

**Industry 4.0 ready**
