

OAJ WATER SOLUBLE CORED WIRE

FEATURES

- Excellent Wetting Properties
- High Activity Level
- Reduces Oxidation of Solder Iron Tip
- Residue Washes Easily with DI Water Alone
- Excellent Thermal Transfer

DESCRIPTION

OAJ Flux Cored Solder Wire has been formulated with an innovative amine neutralized halide-activator system. This novel system offers a high activation level that provides rapid oxide removal and maximum capillary action, resulting in faster wetting on all surface finishes and plating. OAJ flux residues MUST be removed after soldering. IPC flux classification – ORH1.

STANDARD AVAILABILITY

OAJ Cored Wire is available in Sn/Pb, SAC305 and SN100C $^{\mbox{\ensuremath{\mathbb{S}}}}$ alloys. Other alloys, diameters and spool sizes may be available upon request.

APPLICATION

Solder iron tip temperature should be between $350^{\circ} - 400^{\circ}C$ ($650^{\circ} - 750^{\circ}F$) for Sn63, Sn62 and Sn60 alloys, $370^{\circ} - 425^{\circ}C$ ($700^{\circ} - 800^{\circ}F$) for SN100C®, Sn/Ag and Sn/Ag/Cu (SAC305, SAC405, CASTIN, etc.) alloys.

HANDLING & STORAGE

Time	Conditions
3 years	Cool < 30°C (< 86°F) Dry < 75%Rh

Store cored wire in a clean, dry area away from moisture and sunlight. Avoid freezing.

CLEANING

Post-process residues can remain in place up to 8 hours^{*}. Flux residue can be removed with normal tap water @ 38° - $60^{\circ}C$ (100° - $140^{\circ}F$) with a DI water final rinse. Use of a pressurized spray cleaning system is suggested, but is not required.

*Environment and application dependent

SAFETY

Use with adequate ventilation and proper personal protective equipment. Refer to the accompanying Safety Data Sheet for any specific emergency information. Do not dispose of any hazardous materials in non-approved containers.
